

I'm a **frontend-developer** with 1,5 years of experience currently based in Russia 🇷🇺

I have worked in a small team, working on supporting multiple websites for a city structures and tourist events. Working, I've become a pro at learning, so now I can master any new technology in 1-2 weeks :)

august 2021 - present **Frontend-developer** (freelance)

Used technologies:

- HTML 5, CSS + preprocessors (Bootstrap, SASS, jQuery)
- JavaScript, React, Redux
- RESTful APIs
- Git, GitHub
- Figma

Responsibilities:

- development of projects' UI-layouts in Figma;
- building responsive layouts with HTML5, CSS3 and its preprocessors;
- writing web-applications using JavaScript (ES6), React and Redux;
- connecting external APIs.

All of my projects are available on [GitHub](#) or on [my webpage](#) *links are clickable

september 2021 - **Junior Frontend-разработчик React** (yarovoe_official)

august 2022

Developed and maintained UI for websites and applications supported by the company - starting from landing pages and ending with SPA applications

Responsibilities:

- adaptive layout of Figma layouts using HTML5, CSS3, SASS
- writing web applications in vanilla JavaScript (ES6), including using React + Redux
- support for the client side of sites - connecting external APIs
- refactoring and updating existing code
- bug fixing- teamwork

Results:

- refactored and optimized the intranet project from an outdated library (jQuery + ES5) in accordance with ES6 and Material UI standards, which accelerated the process of internal staff communication, and also made intranet services more stable
- created a design and set up 4 landing pages for tourist events from scratch
