I'm a **frontend-developer** currently based in Russia 👷‍♀️

Previously I've worked in communications, ed-tech and UX-research for 3 years. My biggest project so far has been the development of the course for the ed-tech platform SberClass, which belongs to the biggest russian fintech organisation Sber.

---

august 2020 - present   **Frontend-developer** (freelance)

Used technologies:
- HTML 5, CSS + preprocessors (Bootstrap, SASS, jQuery)
- JavaScript, React, Redux
- RESTful APIs
- Git, GitHub
- Figma

Responsibilities:
- development of projects' UI-layouts in Figma;
- building responsive layouts with HTML5, CSS3 and its preprocessors;
- writing web-applications using JavaScript (ES6), React and Redux;
- connecting external APIs.

*All of my projects are available on **GitHub** or on **my webpage** *links are clickable*

december 2020 -   **Academic Tutor** (RANEPA, Moscow)
august 2022

Responsibilities:
- consulting students of MSSES and Liberal Arts College on the following topics: writing and editing academic texts, handling administrative challenges, psychological support;
- automatization and optimization of the online educational process.

Achievments:
- launched the service of tutor support in the university in collaboration with the team;
- developed and automated mechanism for distributing students between tutors depending on students' major, the questions they want to discuss and the time they have;
- conducted the onboarding for the new specialists twice (once per academic year).

december 2019 -   **UX-researcher** (contract)
may 2021

I was hired by an education reseatcher Peter Safronov for conducting multiple user researches, creating UX-flows, methology and an MVP for an educational course on SberClass platform.
